ESSENTIALS SERIES 5.0
High-Performance LED High Bay
Essentials series 5.0 fixtures are high-quality LED high bays designed for use in industrial and manufacturing facilities, warehouses, indoor sports facilities, aviation hangars, convention centers, car dealerships and more.

Essentials series 5.0 lumens range from 6,000 to 97,000 lumens delivering up to 206 lumens per watt. The energy savings are significant compared to conventional fixtures and other LED fixtures with efficacies in the low hundreds. These fixtures come standard with a 5-year guaranteed lumen maintenance warranty with the option to upgrade to a 7- and 10-year lumen maintenance warranty or a 10-year premium warranty that includes parts and labor reimbursement.

Essentials series 5.0 has a variety of options for lenses, and a no lens option featuring an invisible nano-coating that maximizes efficacy and protects the LEDs from the environment and external agents such as humidity, dust, and other debris.
The Essentials Series 5.0 features vertical extruded aluminum heat sinks with ample separation for maximum heat dissipation and airflow through the fixture. This allows for continuous operation under 65°C ambient temperatures with high performance and long life.
Optimize the light distribution easily at any time on the field to suit your lighting needs. Outer modules can be set to 0°, 45°, 90° and 135°.
LED HIGH BAYS WITH GUARANTEED LIFE

STANDARD L70 5-YEAR WARRANTY
All fixtures come with our Standard Warranty, covering L70 light levels for 5 years, no matter how long the lights are on. That’s 43,800 hours based on a 24/7 operation.

10Y PREMIUM WARRANTY
Our Premium Warranty, offered as an option, covers L70, parts and labor for 10 years, no matter how long the lights are on. That’s 87,600 hours based on a 24/7 operation.
